About Us

Coffee is a beverage brewed from the roasted and ground seeds of the tropical evergreen coffee plant. Coffee is one of the three most popular beverages in the world (alongside [water](#) and [tea](#)), and it is one of the most profitable international commodities. Wild coffee plants, probably from Kefa (Kaffa), Ethiopia, were taken to southern Arabia and placed under cultivation in the 15th century. The popularity of coffee in the Arab world led to the creation of the [coffeehouse](#), first in Mecca and then in Constantinople in the 15th and 16th centuries, respectively. Coffee was introduced into one European country after another throughout the 16th and 17th centuries.

The [espresso](#) machine forces boiled water under pressure through finely ground coffee. Single-serve coffeemakers also force hot water through coffee grounds.

Coffee was introduced into one European country after another throughout the 16th and 17th centuries. Many accounts are recorded of its prohibition or approval as a religious, political, and medical potion. By the end of the 17th century, [coffeehouses](#) were flourishing across Britain, the British colonies in [America](#), and continental Europe.
